

## THE SPONSOR

The **Southeast Florida Association for Psychoanalytic Psychology (SEFAPP)** is a local chapter of the Division of Psychoanalysis (39) of the American Psychological Association.

SEFAPP is a multi-disciplinary group dedicated to furthering the study and application of broad-based psychoanalysis, psychoanalytic psychotherapy and the methods of psychoanalytic inquiry through the sponsorship of conferences, symposia and workshops on clinical issues, theoretical papers and ongoing research by SEFAPP members and recognized experts in the field.

Members can attend **SEFAPP Scientific Meetings**, the **Annual All-Day Conference**, the **Symposium Brunch Series** and the **film Study Series** at reduced fees and post their professional news, events and classifieds for free on our online "Members Area". Members receive a free subscription to our quarterly newsletter ***Psyche & Sol*** and the opportunity to submit articles. The new **online Membership Directory** allows members a further resource for referrals and professional connections.

### For more information please contact:

Cristina Virsida, SEFAPP Administrator

*\* Includes Continental Breakfast*

*Refund Policy – Refunds will be made upon written request until event date. No refunds will be made after event date.*

**THE PRESENTATION**

INSTRUCTIONAL LEVEL: INTERMEDIATE

This workshop will focus on new approaches to psychoanalytic psychotherapy with individuals with narcissistic psychopathology who have long been recognized as posing formidable challenges to their clinicians. All theoretical schools are in agreement that individuals with narcissistic disorders possess a heightened vulnerability in the sense of self, for which the typical narcissistic presentation (e.g., grandiosity, exploitativeness, entitlement) compensates. Whether the grandiose self of these patients is expressed overtly in self-aggrandizing behavior or covertly in hidden grandiose fantasies, the patients' difficulties allowing for a healthy dependency upon and attachment to the therapist, as well as their difficulties tolerating interpretive work that requires a degree of objectivity and reflection, pose significant technical challenges. For the past 20 years, a group of psychoanalytic clinicians and clinical researchers at the Personality Disorders Institute (PDI) at Weill Medical Center of Cornell University have been working to develop an evidence-based psychoanalytically-oriented psychotherapy, Transference Focused Psychotherapy (TFP) based on object relations theory, for individuals with a range of personality disorders at different levels of severity, including narcissistic disorders.

Case material will be presented to illustrate both how our understanding of attachment substrate of severe narcissistic disorders has contributed to our modifications of TFP technique to more successfully engage and treat patients with severe narcissistic disorders. The presentation of case material from workshop participants will also be encouraged.

**THE PRESENTER**

**Diana Diamond** is Professor in the Doctoral Program in Clinical Psychology at the City University of New York, and Adjunct Assistant Professor of Psychiatry at the Weill Medical Center of Cornell University, where she is also a senior fellow in the Personality Disorders Institute. Her primary interest is in the development, investigation, teaching, and practice of psychoanalytic psychotherapy and psychoanalysis for personality disorders. She has co-authored and edited several books, including *Borderline Patients: Extending the Limits of Treatability* (with Drs. Koenigsberg, Kernberg, Stone, Appelbaum, and Yeomans, Basic Books, 2000), and most recently, *Attachment and Sexuality* (co-edited with Sidney Blatt and Joe Lichtenberg). She is on the Editorial Boards of *Psychoanalytic Psychology*, *Psychological Issues*, the *Journal of Couple and Family Psychoanalysis*, and *Psychoanalytic Inquiry*. She is a graduate of the New York University Postdoctoral Program in Psychotherapy and Psychoanalysis, and is in private practice in New York. She is also a member at large of the board of directors of the Division of Psychoanalysis (39) of the American Psychological Association.

**THE SCHEDULE**

8:30 am to 9:00 am	Registration and Continental Breakfast
9:00 am to 9:15 am	Welcome and Introductions Donna Bentolila, Ph.D., LCSW President
9:15 am to 10:30 am	<b>Presentation Part 1</b> Diana Diamond, Ph.D.
10:30 am to 10:45 am	Discussion
10:45 am to 11:00 am	Break
11:00 am to 12:15 pm	<b>Presentation Part 2</b> Diana Diamond, Ph.D.
12:15 pm to 12:30 pm	Open Discussion
12:30 pm	Complete Evaluation Forms and Adjourn

**THE LEARNING OBJECTIVES**

*After attending this program in full, participants will be able to:*

1. Describe the object relations underpinnings of TFP theory and technique for narcissistic disorders.
2. Describe some of the technical difficulties associated with conducting psychoanalytic psychotherapy with patients with narcissistic disorders and TFP modifications thought to enhance therapeutic efficacy.
3. Describe how an understanding of the characteristic attachment patterns of individuals with narcissistic pathology may expand the clinician's understanding of the patient's internal world.
4. Understand the ways in which the representations of early attachment relationships affect the current nature of the patient-therapist relationship for individuals with narcissistic disorders, and apply this understanding to treatment.
5. Describe deficits in mentalization for patients with narcissistic personality disorder and understand how such deficits affect the treatment process and relationship.
